About Company and Requirement: Commvault (<https://www.commvault.com>)

Commvault Systems is a renowned global leader in data management and protection solutions. With over two decades of experience, Commvault has established itself as a trusted partner for organizations seeking to safeguard, manage, and harness their data assets effectively.

The company offers a comprehensive suite of data management software and services, encompassing backup and recovery, cloud integration, data governance, and more. Commvault's cutting-edge technology empowers businesses to optimize data utilization, streamline operations, and enhance overall efficiency.

Education and Eligibility:

- BE / BTech (CS / IT) - 2025 batch
- No criteria for 10th, 12th, Diploma
- 8 and above CGPA
- No live backlog

Desired Skills:

- Excellent logical and analytical skills
- Strong programming skills in C, C++, Data Structure, Java, etc
- Excellent knowledge of RDBMS

Role: Research Project Intern

Commvault will sponsor and define specific research projects in the realm of data management, which align with our business objectives and industry trends.

Selected students will work on these projects. These students will dedicate time per week to working from the Commvault office and college, ensuring close collaboration and access to resources.

Students will gain valuable industry experience, exposure to real-world challenges, and the opportunity to work on cutting-edge technology, enhancing their career prospects and skillsets.

Initial collaboration period of 6 months with the possibility of extension based on mutual interest and outcomes.

Offline Campus Date: 4th Week of Jan 2024 (Exact date, schedule will be informed to the shortlisted students)

How to Apply:

Eligible and Interested Students should fill up the following application form. Further details will be informed to the shortlisted students.

IMP Note:

- Profound / Client reserves all rights to cancel / modify / make any changes related to this campus without any prior intimation.
